

WINDTAG FOR COURSES

MAPPING THE INVISIBLE HAZARD

TAGMARSHAL
golf course optimization

WindTag is a novel, industry-first innovation by Tagmarshal that shows players **hyperlocal, real-time wind speed and direction** on every green, as well as precise hole locations.

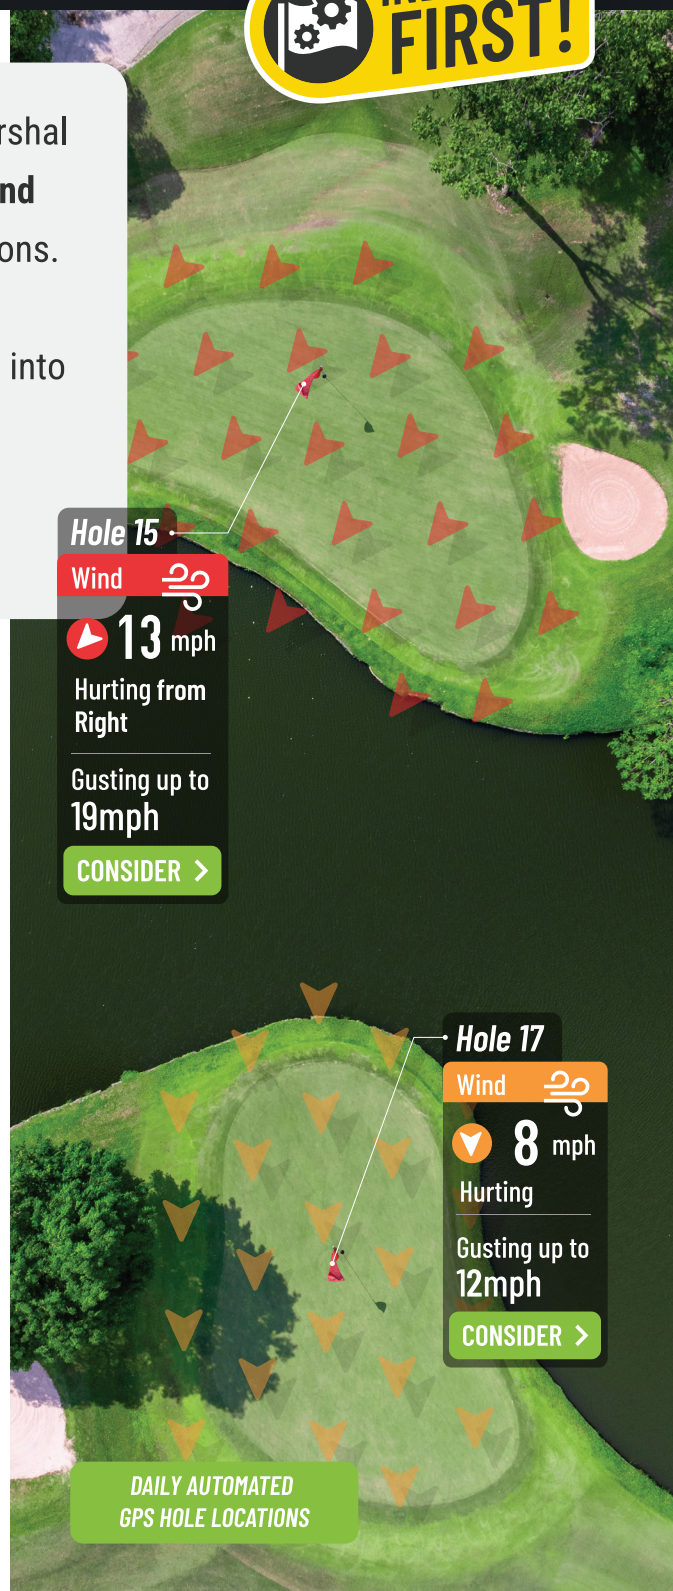

No more "What is the wind doing?" while tossing grass into the air, or checking a distant flag and trees. Give your players **accurate, up-to-the-second wind intelligence and yardage** to make more birdies.

WHY GOLFERS WILL LOVE WINDTAG

- Live wind speed and direction measured on green
- Precise distance to the hole to help choose the right club
- Live shot recommendations to account for wind around distance, club, trajectory and target

HUGE BENEFIT TO COURSES, TOO

- Wind and hole intelligence for your golfers will improve pace of play
- Daily hole locations automatically feed into Tagmarshal's system
- Save labor hours – no manual pin location measurements
- Increased data for optimization strategies and pace of play management
